English **Arabic**
C1 Advanced (EF set)

Projects

EMS-Employee Management System 07/2025 – 09/2025
Developed a hybrid Employee Attendance & Management System combining an
ESP32/ESP32-CAM terminal with fingerprint and face recognition and a cloud-
backed mobile app for managers. The system performs secure check-in/check-
out, real-time logging to Firebase, leave requests/approvals, and push
notifications to improve attendance accuracy and administrative efficiency.
